Germany's Terms.

Dr. Bernhard Dernburg, the former head of the millenpium. German colonial office, is generally understood to be the chief publicity agent of Germany in this country. Our German friends thought some time ago that England had the ear of our people to better advantage than they did. Dr. Dernburg is the son of an editor of the Berlin Tageblatt, and he was for several years in this country in the banking house of Ladenburg, Thalmann & Co., in New York. After his return to Germany he occupied an important official banking place there, and was put at the head of the colonial office in 1907 because it was thought that his American business training had peculiarly fitted him for this work. He has always been known as a warm friend of the United States and as a German who has understood this country better than the majority of his countrymen. He has a host of friends here.
